

## Upgrade procedure

1. Charge the battery.
2. Remove the SD card.
3. Turn off the device.
4. Connect the device by USB cable to PC.
5. Turn on the device.
6. The application will show error, click ok on the screen and ignore that.
7. You should find in your PC new USB DISK. The letter depends on your configuration.
8. In that disk you have NAV directory. You should copy there the file `wyglad.exe` from zip file and replace it. You should use the file for your version `FLOW_TS_43.zip` is for single sensor, `FLOW_TS_43_DUO.zip` for two sensor application.
9. After that unplug the device from PC and restart it.
10. The GPS should work now.
11. If you have any problems, please write to [info@flowtreks.com](mailto:info@flowtreks.com)
